

Grab-It™ Cutout Fuse

The patented Grab-It™ offers a safe and simple method to remove and install overhead fuse barrels. It is a spline end attachment that allows total control of a fuse barrel, even in high winds. Work smarter and prevent accidental drops with the Grab-It™.

The Grab-It™ easily attaches to any cutout. Simply sweep behind the fuse barrel, push up to engage the patented forks, then lift and remove. It works on any size hot stick, from the ground or in a bucket.

The Grab-It™ is machined from aircraft grade aluminum to provide years of trouble free operation. The Grab-It™ has no moving parts, no springs and no plastic parts to break.
