

GRAB-IT™ CUTOUT FUSE TUBE REMOVAL TOOL

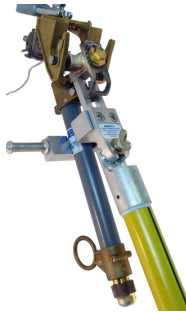

OPERATION MANUAL

STEP 1

Sweep the Grab-It™ behind the barrel of the fuse. Position the Grab-It™ so that the fuse rests in the notch, located between the probe and integrated forks.

STEP 2

Slide the Grab-It™ upward so that the integrated forks engage the fuse's cradle.

STEP 3

Lift and lower fuse assembly from the cutout body. Reverse the steps for fuse tube installation.

FUNCTIONS:

- Offers a safe, simple method to remove and install overhead fuse barrels
- Provides improved control of fuse barrels (even in high winds)
- Reduces accidental drops
