

# METER GRABBER

## OPERATION MANUAL

**WARNING**

Proper safety equipment and clothing should be worn by the operator in accordance with local practices and procedures. Only qualified personnel should operate the Meter Grabber.

The Meter Grabber works on both single and multi-phase meters, providing increased protection from accidents due to faults.

**USMG-001:** Positively captures the meter base to decrease the possibility of dropped or damaged meter during change outs.

**USMG-002:** Features a polymer arc shield around the base for additional protection during meter change outs.

### METER REMOVAL

**STEP 1**

With the lever pulled back in the "OPEN" position, orient the Meter Grabber over the meter.

**STEP 2**

Push the lever toward the meter into the "CLOSED" position, locking the tool in place.

**STEP 3**

Pull straight back on the handle, removing the meter.

### METER INSTALLATION

**STEP 1**

Secure the meter inside the tool with the lever in the "CLOSED" position.

**STEP 2**

Push the meter in place, aligning the tabs with the meter base.

**STEP 3**

Pull the lever back into the "OPEN" position, releasing the installed meter.
