

## Tail Tamer™ - Temporary Conductor Clamp

The Tail Tamer™ (patent pending) is a revolutionary lineman invention that safely controls conductors during construction and maintenance. It is a temporary, multi-purpose hot line clamp for stringing, cutting and connecting overhead conductors.

Lineman can get more done while creating a safer work area with the Tail Tamer™.

1. Safely **hold back tail ends** of conductors when stringing new wire. Current method is usually tape.

2. **Safely cut slack conductors** (up to 200 lbs. of tension between Clamp & Carabiner) while maintaining positive control of loose ends.

3. The Double Sided Clamp **holds two conductors simultaneously**. Easily attach parallel groove and crimp connectors.
4. Functions as a **Temporary Parallel Groove Connector** rated at 300 Amps.

**Features**

- Double Sided Clamp
- Holds TWO Wires Simultaneously (#6 Copper up to 954 ACSR or 1.1" dia)
- Quick Release Clamp and Easy Grip Barrel
- Rated at 300 Amps
- Rated up to 200 lbs between Clamp & Carabiner (w/ 5 times safety factor)
- High Strength Tether and Carabiner Connects to Each Other, Buckets, Belts and more
- Works as a single unit or in pairs
- Only 1.5 lbs
- Patent Pending
